Java

```java
class Solution {
    public int longestBalanced(String s) {

    }
}
```

JavaScript

```javascript
/**
 * @param {string} s
 * @return {number}
 */
var longestBalanced = function(s) {

};
```

TypeScript

```typescript
function longestBalanced(s: string): number {

};
```

C++

```cpp
class Solution {
public:
    int longestBalanced(string s) {

    }
};
```

C#

```csharp
public class Solution {
    public int LongestBalanced(string s) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun longestBalanced(s: String): Int {

    }
}
```

Go

```go
func longestBalanced(s string) int {

}
```
